

# Preventive Health & Safety Training in the Childcare Setting

**Are you planning to become a licensed provider? If so, this mandatory course is for you**

**Schedule your 8-hour training**

This 4-part series meets the 8 hour qualifications of the health and safety codes required to become a licensed childcare provider in California. In order to receive a childcare license, at least one director or teacher at each childcare facility must have a total of 16 hours of health and safety training. This includes 8 hours of CPR and First Aid and 8 hours of Preventative Health and Safety training.

Preventative health focuses on the recognition, management, and prevention of infectious diseases, injury prevention, emergency preparedness, sanitary food handling, and nutrition. As a childcare provider you have an important role in the development of our children and can significantly impact their long term health.

Sierra Nevada Children's Services (SNCS) is your regional hub providing technical assistance in Preventative Health and Safety Practices trainings. You must sign up and attend all four sessions to receive certification..
